

Raghav Jindal

Backend-first Fullstack Engineer | Node.js · TypeScript · Next.js · Solana

github.com/HiberNuts | portfolio-1-chi-nine.vercel.app | raghavjindal0212@gmail.com | +91 8015637209 | @hibernuts | Bengaluru, India

PROFILE

Backend First Full Stack Engineer who builds systems that don't fall apart under load. Works primarily with Node.js, TypeScript, React, and Next.js, designing APIs, data models, and distributed backends with production constraints in mind. Strong Web3 background across EVM chains and Solana, spanning smart contracts, DeFi mechanics, wallet infrastructure, and on-chain/off-chain coordination.

WORK EXPERIENCE

Riverline

Software Engineer | Bengaluru, India

May 2026 - July 2026

Most recently worked on a borrower-first AI debt-resolution platform for banks and digital lenders. Helped build production workflows using multilingual AI agents across calls, WhatsApp, email, and SMS, automated collection campaigns, and real-time operational visibility.

CrackedDevs.com

Founding Engineer | Remote

May 2024 - May 2026

Worked as a founding engineer at a remote tech collective shipping blockchain, AI, and full-stack products for startup clients. Owned architecture, backend, smart contracts, and deployment across decentralized trading tools, NFT platforms, crypto payment systems, real-time AI agents, and data scraping pipelines.

DecentraClasses

Co-founder & Developer | Remote

2022 - 2024

Led end-to-end development of fullstack blockchain education platform with dynamic course delivery, live cohorts, and custom in-browser Solidity code editor with real-time compilation. Built user dashboards, NFT-based certification on EVM chains, and token-gated content. Tech: Next.js, Node.js, MongoDB, IPFS.

Tamil Nadu Engineering Association

Full Stack Developer Intern | Tamil Nadu, India

2023

Migrated legacy government systems to modern web stacks for 2023 Tamil Nadu counselling process. Built platform handling college seat allocation across 500+ institutions serving 100,000+ students.

Cookr

Full Stack Developer Intern | Tamil Nadu, India

2022 - 2023

Worked on home-made food delivery app implementing customer ordering, cook registration, and order management. Learned production-level coding and scalable architecture patterns.

PROJECTS

Qwik

[qwikcard.app](#)

Comprehensive fintech backend API powering digital banking with card management, payment processing, and financial analytics.

Node.js

TypeScript

PostgreSQL

Microservices

Whop

[whop.com](#)

Built crypto narrative features for American social commerce platform, enabling blockchain-based functionality and Web3 integrations.

Node.js
