

Raghav Jindal

AI & Backend Engineer · Production Agents · Voice AI · Distributed Systems

Bengaluru, India · +91 80156 37209 · raghavjindal0212@gmail.com · github.com/HiberNuts · www.raghav.works

PROFESSIONAL SUMMARY

Backend-first engineer building production AI-agent workflows and reliable distributed systems with Node.js, TypeScript, PostgreSQL, Redis, Temporal, and AWS. Shipped multilingual voice and messaging agents, LLM orchestration and evaluation systems, fintech/payment platforms, and high-volume public services from architecture through deployment and production operations.

TECHNICAL SKILLS

AI Systems: AI agents, AI evaluation, agentic workflows, LLM APIs, LLM orchestration, voice AI, conversational AI, prompt engineering, simulation testing, guardrails, human-in-the-loop, Temporal, Vapi, Anthropic API
Backend & Data: Node.js, TypeScript, JavaScript, Express.js, REST APIs, microservices, event-driven systems, PostgreSQL, Redis, MongoDB, Prisma, BullMQ, system design
Cloud & Product: AWS, Docker, CI/CD, Datadog, observability, distributed systems, Git, React, Next.js, Tailwind CSS, Stripe, payments, fintech

PROFESSIONAL EXPERIENCE

Riverline · Software Engineer May 2026 – Jul 2026

Bengaluru, India · AI debt-resolution platform for banks and digital lenders

- Helped build production workflows for multilingual AI agents across voice calls, WhatsApp, email, and SMS, creating consistent borrower journeys across channels.
- Worked on automated campaign workflows and real-time operational visibility for reliable, compliance-sensitive customer communication.

CrackedDevs · Founding Engineer May 2024 – May 2026

Remote · Startup product engineering

- Owned architecture, backend services, integrations, infrastructure, and deployment for early-stage products across AI agents, payments, data pipelines, and customer-facing applications.
- Shipped real-time systems using Node.js, TypeScript, PostgreSQL, Redis, AWS, and Rust; monitored, debugged, and iterated under production constraints.
- Worked directly with founders to scope and deliver 0→1 products on tight timelines, moving from ambiguous requirements to deployed software.

DecentraClasses · Co-founder & Developer 2022 – 2024

Remote · Education platform and developer tooling

- Built a full-stack learning platform from zero to production with Next.js, Node.js, MongoDB, IPFS, live cohorts, a CMS, and learner progress workflows.
- Developed an in-browser Solidity editor with real-time compilation and automated evaluation for hands-on programming exercises.

Tamil Nadu Engineering Association · Full-Stack Intern 2023

- Migrated legacy government systems for a counselling platform used by 100,000+ students in one month and allocating seats across 500+ institutions.

SELECTED SYSTEMS & PROJECTS

Fundlio · Payments & Wallet Infrastructure

- Building payment infrastructure for merchant onboarding, KYC, wallet and card payments, settlements, refunds, disputes, background jobs, and observability with TypeScript, Node.js, PostgreSQL, Redis/BullMQ, Stripe, Wise, and Datadog.
- The platform processes around \$30K in transaction volume each week.

VoiceGrid · AI Voice Operations

- Building voice-agent infrastructure for conversation orchestration, tool integrations, evaluation, failure handling, and production observability.
- Partnered with leading healthcare agencies for pilots and handles around 300 outbound calls per day.

Qwik · Fintech Banking Backend

- Built Node.js/TypeScript/PostgreSQL APIs for cards, payment processing, budgeting, and financial analytics, with an emphasis on correctness in transactional workflows.

EDUCATION & RECOGNITION

B.Tech, Information Technology · Government College of Technology · 2020–2024 · CGPA 8.6/10

Winner · ETH India 2024 | Winner · ETH Singapore 2023
